

Deepak Kumar

Full Stack Developer (MERN) — Distributed Systems — DSA

✉ deepakdagur0007@gmail.com ☎ +91-6397148409 in LinkedIn 🌐 GitHub

Professional Summary

Full Stack Developer with **1.5+ years of experience**. Skilled in designing and building **scalable web applications**, **real-time systems**, and **distributed architectures**. Proficient in **concurrency**, **caching**, and **system design principles**, with hands-on experience in delivering **production-ready projects**. Experienced in contributing to **50+ GitHub repositories** and participating in multiple hackathons.

Education

ABES Engineering College, Ghaziabad
B.Tech in Computer Science

Jul 2023 – Jul 2027
CGPA: 8.27/10

Professional Experience

Full Stack Engineer Intern, ACT Business Solutions

Apr 2026 – Present

- Developed **scalable features** using the **MERN stack** and optimized **API performance**.
- Built and integrated **RESTful APIs** with **React.js** for seamless frontend-backend data flow.
- Refactored components for **high reusability**, reducing code redundancy and load times.
- Enhanced security by implementing **JWT authentication** and custom **middleware**.
- Participated in **Agile sprints** and **code reviews** to ensure production-grade quality.

Technical Coordinator, ABES E-Cell

June 2025 – Present

- Developed and maintained website sections for events and announcements.
- Built registration systems and improved user interaction experience.

Technical Skills

Languages: JavaScript, C++

Frontend: React.js, Tailwind CSS, Bootstrap, HTML5, CSS3, Framer Motion

Backend: Node.js, Express.js, REST APIs, JWT Auth, MongoDB/PostgreSQL, Microservices

Databases: MongoDB, PostgreSQL, SQL, Redis

Security & Auth: JWT, Rate Limiting, Middleware, Input Validation

DevOps & Tools: Docker, Docker Compose, Git, GitHub, Postman, Render

Core CS: Operating Systems, DBMS, OOP

Projects

Real-Time Chat Application

MERN Stack, Socket.io 🌐

- Built a full-stack real-time chat system using **React.js**, **Node.js**, **Express.js**, **MongoDB**, **Socket.io**.
- Implemented secure authentication with **JWT** and optimized real-time communication using **WebSockets**.
- Added typing indicators, online/offline status, and media sharing using **HTML5**, **CSS3**, **Tailwind CSS**.

Interview Prep AI

MERN Stack, OpenAI API 🌐

- Developed an AI-powered interview platform using **React.js**, **Node.js**, **Express.js**, **MongoDB**, **Tailwind CSS**.
- Integrated **OpenAI API** to dynamically generate role-specific interview questions.
- Implemented secure authentication and session management with **JWT**.
- Deployed the platform on **Render** for live access.

Distributed Job Queue System

Node.js, Redis, Bull, Docker 🌐

- Built a distributed background job processing system using **Node.js**, **Redis**, **Bull**.
- Implemented retry mechanisms, fault-tolerant workers, and containerization using **Docker**.
- Designed REST APIs and optimized database queries using **PostgreSQL** for high concurrency.

Achievements

- **2nd Place** – Maharaja Agrasen College (University of Delhi) Hackathon 2025
- **4th Place** – IIT Guwahati Hackathon 2026
- **Finalist** – TechSprint Hackathon (DevSangam'26) by GDG
- **Finalist** – AI Summit Hackathon, IIT Ropar
